Education

Indian Institute of Information Technology, Kota

Bachelor of Technology in Computer Science and Engineering

Expected Jun 2026

CGPA: 8.79/10

Experience

YogLabs AI Research Foundation

Software Development Engineer Intern

Mar 2026 – Present

Remote

- Built an agentic information extraction pipeline using Python, LangGraph, OpenAI APIs, and BeautifulSoup to process 100+ research web pages into structured knowledge graphs.
- Developed schema-first extraction workflows and backend processing modules with LLM-based classification, entity linking, and fallback-safe parsing across 3 core entity collections.
- Implemented internal-link web crawling, typed Pydantic schemas, and JSON-validated LLM outputs, improving extraction consistency across heterogeneous websites by 40%.
- Integrated the pipeline into a scalable microservices-based architecture using Flask, MongoDB, Docker, and REST APIs supporting asynchronous worker-based workflows.
- Architected idempotent MongoDB upserts and normalized deduplication logic, reducing duplicate entity generation during repeated crawls by 35%.

Projects

EventHub – Event Booking Platform | *React.js, Node.js, MongoDB, Socket.IO, Redis* Live | GitHub

- Engineered a real-time event booking platform using React.js, Node.js, MongoDB, Socket.IO, Redis, and JWT-based authentication workflows.
- Implemented concurrent seat-selection and live booking synchronization using Socket.IO-based real-time communication supporting multiple simultaneous booking sessions.
- Built 15+ REST API endpoints with Stripe webhook integration, QR-based digital ticket generation, and modular backend architecture for scalable booking workflows.

CartMantra – E-Commerce Platform | *React.js, Express.js, MongoDB, Redis, Stripe* Live | GitHub

- Developed a full-stack e-commerce platform with 20+ REST API endpoints, JWT authentication, Stripe payment integration, coupon workflows, and admin analytics modules.
- Optimized Redis-based caching and backend API workflows, improving frequently accessed product and cart retrieval performance.
- Engineered modular REST APIs, secure role-based access control, and Cloudinary-based media handling supporting scalable e-commerce operations.

Skills

Languages: C/C++, Python, JavaScript, SQL, Java

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

Backend: Node.js, Express.js, Flask, REST APIs, Socket.IO, JWT Authentication

Databases & Cloud: MongoDB, MySQL, Redis, AWS, Docker, Cloudinary

Libraries & Tools: NumPy, Pandas, LangGraph, Git, GitHub, Postman, VS Code, Vercel, Render

Core CS: Data Structures and Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks, Object-Oriented Programming (OOP), Distributed Systems

Achievements

- Solved 450+ algorithmic problems across LeetCode, CodeChef, GeeksforGeeks, and Code360.
- Achieved **LeetCode Knight** badge with a peak rating of **1845**, placing in the top 6.02% globally.
- Secured a 2-Star rating on CodeChef and participated in competitive programming contests across multiple coding platforms.
- Selected among Top 10 teams in HackTheChain 2.0 Hackathon at IIIT Kota for building an emergency response platform.
