

DIVYANSH AGRAWAL

Software Development Engineer

☎ +91-9301956873 ✉ divyansh1001agrawal@gmail.com 🔗 LinkedIn 🌐 GitHub 🌐 Portfolio

Education

Indian Institute of Information Technology, Kota

Bachelor of Technology in Computer Science and Engineering

Nov 2022 – Jun 2026

CGPA: 8.79/10

Experience

YogLabs AI Research Foundation

Software Development Engineer Intern

Mar 2026 – Present

Remote

- Built an agentic information extraction pipeline using Python, LangGraph, OpenAI APIs, and BeautifulSoup to process 100+ research web pages into structured knowledge graphs.
- Developed schema-first extraction workflows and technical design components with LLM-based classification, entity linking, and fallback-safe parsing across 3 core entity collections.
- Implemented internal-link web crawling, typed Pydantic schemas, and JSON-validated LLM outputs, improving extraction consistency across heterogeneous websites by 40%.
- Integrated the pipeline into a scalable microservices architecture using Flask, MongoDB, Docker, and REST APIs supporting asynchronous worker-based workflows.
- Designed idempotent MongoDB upserts and normalized deduplication logic, reducing duplicate entity generation during repeated crawls by 35%.

Projects

EventHub – Event Booking Platform | *React.js, Node.js, MongoDB, Socket.IO, Stripe* Live | GitHub

- Developed a MERN-based event booking platform with JWT authentication, role-based access control, and Stripe payment integration supporting secure transaction workflows.
- Implemented Socket.IO-based real-time notifications, QR-based ticket generation, and Cloudinary media handling, achieving seamless responsiveness across desktop, tablet, and mobile devices.
- Built reusable REST APIs following software development best practices, reducing redundant API requests and improving page response performance by 30%.

CartMantra – E-Commerce Platform | *React.js, Express.js, MongoDB, Redis, Stripe* Live | GitHub

- Created a full-stack e-commerce platform with secure authentication, product management, Stripe payment integration, and order processing workflows.
- Integrated Redis caching and backend optimization techniques, reducing repeated product-fetch response time by approximately 35% under concurrent requests.
- Implemented protected routes, centralized state management, and responsive UI components supporting seamless user experience across desktop and mobile devices.

Skills

Languages: C/C++, Python, JavaScript, SQL, Java

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

Backend: Node.js, Express.js, Flask, REST APIs, Socket.IO, JWT Authentication

Databases & Cloud: MongoDB, MySQL, Redis, AWS, Docker, Cloudinary

Libraries & Tools: NumPy, Pandas, LangGraph, Git, GitHub, Postman, VS Code, Vercel, Render

Core CS: Data Structures and Algorithms (DSA), Operating Systems (OS), Database Management Systems (DBMS), Computer Networks, Object-Oriented Programming (OOP)

Achievements

- Solved 450+ algorithmic problems across LeetCode, CodeChef, GeeksforGeeks, and Code360.
- Achieved **LeetCode Knight** badge with a peak rating of **1845**, placing in the top 6.02% globally.
- Secured a 2-Star rating on CodeChef and solved 100+ data structures and algorithms problems on GeeksforGeeks.
- Selected among Top 10 teams in HackTheChain 2.0 Hackathon at IIIT Kota for building an emergency response platform.
- Earned 70+ Google Arcade badges and multiple Naukri Campus certifications across technical domains.
